

Looking for juiciness and texture?

## Meatless® DRF Coarse

*(Dehydrated Rice Flake Coarse)*

The Dehydrated Rice Flake Coarse has a natural off white colour and a flake size of 2–20 mm. With a protein content of 8% the product is stable at 2 to 30°C in a closed polybag and within a pH value range of 6.2 to 7.2. This ingredient can be declared as (textured) rice flour and as such has a minimal impact on the ingredient list of the final product application.

### CHARACTERISTICS

### HOW TO USE

The Dehydrated Rice Flake Coarse has an unique soft bite with a neutral taste.

This makes it perfect to combine with animal proteins in hybrid products (meat and fish) or for plant-based fish products, in emulsions or as fat replacement in meat products.

Test panels describe this ingredient as adding juiciness and a fatty mouthfeel to your application.
